

Our new Sleep
Disorders Center
is eye-opening.

It'll help put you
right to sleep.

The new Crittenden Regional Hospital Sleep Disorders Center is a wake-up call if you suffer from a chronic sleep problem.

Staffed by full-time sleep specialists and equipped with the latest diagnostic tools, the Center is dedicated to helping you overcome sleep apnea, narcolepsy, chronic insomnia and other sleep disorders. Patients are evaluated, often overnight, in private rooms where sleep patterns, breathing, heart activity and body movements are monitored.

Sleep disorders can cause problems such as hypertension and heart disease. But the good news is that most sleep disorders are treatable. If you have problems sleeping, call 870.733.3815. At Crittenden Regional Hospital we're working day and night to improve your quality of life.

There's a
You in Quality.
